WORK EXPERIENCE

FCONNECT (FootyLight)

Software Engineer

Hybrid

April 2022 – Present

- **Storylens**: Shipped a modular **AI** layer that transforms articles into interactive visuals, summaries, and polls through event-driven architecture, **300+ ROI**, and **70%** input prompt caching.
- **FConnect Widget**: Contributed to **26+** publishers' API integrations and **5 microservices** for widget and video feed systems. Showcased the In-image-widget solution at **DMEXCO**.
- **SocialDesk**: Built a social media photocard generator in days, combining precision image handling, article crawling, and automated content preparation with **0 traditional dev cycle**.
- **Banglapapers**: Architected and developed an AI-powered Bangladeshi news platform that aggregates news from 10+ publishers through an intuitive user-facing experience by using OpenSearch as a semantic search.
- **Widget Builder**: Shipped an internal automation tool that lets non-engineers generate production-ready widget code in under **2 minutes**, replacing a repetitive 30-minute manual workflow.
- **FootyLight App**: Serves football content from across the internet using **4 microservices**, supporting low-latency delivery, high traffic, better engagement, and **32.4%** MAU growth. **App Link**
- **Data Pipeline Development**: Built **10** data parsers with the **ELK** framework, deployed through **Docker** on AWS ECS and Lambda, with a dashboard for inventory collection and updates.
- **Master Dashboard**: Developed an internal dashboard for monitoring widgets, parsers, APIs, ads, and costs, giving administrators access to **7** departmental metrics and daily reports.
- **First-Party Data**: Built a system to monitor user behavior and synchronize data across cost management and inventory systems with real-time consistency and **Google Analytics** insights.

Stack: Node.js, Python, React, Next.js, React Native, AWS Lambda, ECS, DynamoDB, API Gateway, S3, CloudFront, Route53, RAG, OpenSearch, MongoDB, Docker, Tailwind, Material-UI, ELK, Google Analytics.

InfancyIT

Trainee Software Engineer

Sylhet, Bangladesh

October 2020 – December 2020

- **Inquiry System Development**: Designed SQL queries to retrieve business data and support requirement-based reporting.

Stack: SQL, PHP, MySQL.

EDUCATION

Shahjalal University of Science and Technology

Bachelor of Science in Computer Science and Engineering

Sylhet

February 2018 – March 2023

PROJECTS

- **Adaptive Restaurant Operations Forecasting Engine**: Built an AI-powered self learning POC engine that predicts customer demand, staffing, and ingredient while continuously improving accuracy through feedback. **Link**
Stack: FastAPI, Python, Pytest, Streamlit, LightGBM, SGDRegressor, React.
- **Swapnanagar**: Built a charity platform **swapnanagar.org** with figma MCP enabling dynamic donation management, campaign handling, and PayPal-based payment flow.
Stack: React, Bootstrap, Strapi, PayPal API, MongoDB, JavaScript, Node.js.
- **Hyperledger Fabric Management System**: Built a management interface for Hyperledger Fabric that simplified user interactions by removing CLI complexities.
Stack: Hyperledger Fabric, Docker, Node.js, JavaScript.

ENGINEERING STACK

AI Development Stack: RAG, MCP, Agents, Langchain, Claude Code, Codex, Antigravity, Pi, OpenCode, Cursor.

Frontend: React.js, Next.js, React Native, Redux, TypeScript, JavaScript, Tailwind, Material-UI.

Backend: Node.js, Express.js, FastAPI, Python, Go, PHP, Microservices, Event-Driven Architecture.

Cloud & DevOps: AWS(Lambda, ECS, Opensearch, S3, API Gateway, Route53), Docker CI/CD, GitHub Actions.

Database & Tools: DynamoDB, MongoDB, MySQL, PostgreSQL, Firebase, Pinecone, ELK Stack.
